# ***PARS*** Mulcher & Collector

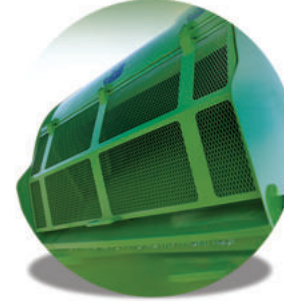

***PARS***

-A rotor with a working width of 200cm. It features 42 conveying blades and 24 shredder blades-

-Conveying Rotor Chain Power Transmission, while the shredder rotor features a triple belt power transmission for safety purposes-

-Hydraulic Lift Storage System  
A hydraulic lift storage system with a 1 m3 storage volume and a 180cm discharge height-

Agromeks - Pars - Branch Mulcher and Collector Machine offers a significant solution in orchard maintenance. With this innovative product, the effective collection and processing of diseased and unnecessary branches in orchards become possible. Additionally, the materials obtained during this process can be used in fertilizer and bioenergy production. The machine, with a working width of 200 cm, enables easy collection of pruned branches in orchards, greenhouses, and other agricultural areas. The collected branches are then processed, compacted, and made easier to transport. Agromeks - Pars - Branch Collection and Chopping Machine promotes the recycling of collected materials, providing environmental benefits and enabling economic gain. These materials become a valuable resource for pellet factories and bioenergy production facilities. Furthermore, in a period where labor costs are increasing, this machine significantly reduces labor costs, providing substantial savings to businesses. It is an ideal solution to increase efficiency in the agricultural sector and support universal sustainability.

Working Width	200cm
Width	215cm
Length	300cm
Height	177cm
Working Height	265cm
Weight	1450kg
Storage Capacity	1m3
PTO	540rpm
Drum rpm	1800-2000rpm
Speed	5-10km/hr
Hydraulic Power Supply	Tractor
Required Tractor Power	Min. 55hp
Shredder Blade Type	Hammer
Shredder Blade Number	24
Crusher Drum Width	170cm
Tyres	16,5/6,5-80
Warranty	2 Years
